# PADDOCK, STRONG CANDIDATE FOR OLYMPIC TEAM, TIMED 92-5 SECONDS IN "HUNDRED"

Pacific Coast Is Rich in Athletic Material for in Addition to California's Marvellous Sprinter, Stanford Has Great Jumper in Kirksey and Jack Merchand Is the World's Greatest All Around Athlete-Advance in Amateur Athletics Due to Training in Army Camps.

Copyright, 1520, by The Press Publishing Co. (The New York Svening World). HARLES PADDOCK of California has rounded into form that makes him a world beater at both the 100-yard and the 220-yard sprints, and America's strongest candidate for the Olympic team that

The amazing advance in amateur thield sports this year is largely at London and Stockholm, with larger and better teams. Yet these due to our athletic war work. Thousands of athletes were developed in the army camps, and the interest officerion of champions we will have aroused by army sports and athletic after the June tryonts, to select from training has made thousands of college boys devote more time to sports.

Not many years ago a college athletic for the Amsterdam meet.

GREATEST ATHLETES THE WORLD EVER SAW.

The coming Olympic Games at Amsterdam will be the greatest ever held. Scores of world's records will be broken. No champion ever was so great that a greater might not appear in another year, and this looks like the year for amazing performances. The United States will not have the easy task of former years, and yet the U.S. A. team will be supowerful that we can expect the same clean sweep in a majority of events. pixces will send strong teams to amsterdam, and there will be cham-plons amone their number. Swedon and Finland, both strong in the last new men and quietly working to "put something over." They will have record men in distance running javalin and discus throwing and sho putting. But America never made auch a concerted effort to dig out our best material before, and American ica's fear will be invincible. With all colleges and clubs training the star athletes and sending them to the great try-outs in the Far West, Mic-dle West and East, the champions to gather for one tremendous final try-out in New York before final selec-tions are made, we will for the jest time in American history have a fearn that will irrely represent every part of the country. With the natural adthe country. With the natural four years of intensive training, this team will be far beyond anything we ever had before. It is to be hoped that the A. A. been credited with \$3.5 seconds, a world mark, and it is guite possible he shaded \$3.5. He has run consistently in \$4.5 through the early part of the season and on tracks not mearly as fast as the splendid tracks at Eastern colleges.

Paddock is a stockily built, powerstul fellow. He runs the sprints in much the same style as Meredith uses in longer races, with a powerful, plunging stride. His great strength secounts for his remarkable speed on poor tracks.

Old timers may remember Johnny Grum, who went East from Nebraska in 1836 and won both the 100 and the 220 yard events in the intercollegiate championships, making record time. Paddock is of the same type, a confident, cool man on the mark and a runner who tears up the ground and goes through with a tremendous rush from gun to tape.

The Pactific Const is strong in sprinters and jumpers this year. Morels Kirksey of Stamford has been wirning the 100-yard sprint in \$4.5 and the 220-yard dash in 214.5 seconds good enough for Olympic honors.
